

# ECO395M\_Homework1:EvanAldrich

Evan Aldrich

2024-01-20

```
{r setup, include=FALSE} knitr::opts_chunk$set(echo = TRUE)
```

## R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
“{r cars} x = 3+2
```

### ## Including Plots

You can also embed plots, for example:

```
“{r setup, echo=FALSE}  
plot(pressure)
```

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.

```
{r eval=TRUE, echo=FALSE} library(tidyverse) flights = read.csv('ABIA.csv', header=TRUE)  
head
```
